PROJECTS

Fortisafe

<https://github.com/katz-dev/fortisafe>

FortiSafe is a cybersecurity platform tackling modern challenges with a three-tier architecture.

- Developed a browser extension for real-time protection and password management
- Created a web application to serve as a comprehensive password management dashboard
- Implemented a backend API for secure authentication, password storage, and security scanning

Online-Library-Book-Store-Book-Boulevard

<https://github.com/katz-dev/Online-Library-Book-Store-Book-Boulevard>

Book Boulevard is a dynamic platform designed for the avid reader and aspiring author alike. Whether you're looking to discover your next favorite book or share your literary creations with the world, Book Boulevard has you covered.

- Designed a dynamic platform for readers and authors to discover and share books

SUMMARY

I am a dedicated Software Support Engineer and Full-Stack Developer with over 6 years of experience. Currently working at VFT HOLDINGS (PVT) LTD, I specialize in supporting Futura HRIS systems, managing biometric device integration with ADMS and HRIS, and providing technical solutions. I possess a strong foundation in MERN stack technologies (MongoDB, Express.js, React, Node.js), JavaScript, and extensive experience with frameworks like NestJS for robust backend development and Next.js for modern, high-performance frontends. I have solid expertise in database systems like MySQL and MongoDB, API testing with Postman, and technical troubleshooting. My knowledge of Lua programming further enhances my ability to create immersive gaming experiences. I am passionate about crafting innovative solutions and delivering high-quality work.

SKILLS

Programming Languages

JavaScript, Lua, HTML, CSS, Python, C, C#, Java

Frameworks & Libraries

React, Nest.js, Next.js, Express, Node.js

Databases

MongoDB, PostgreSQL, MySQL, Firebase

Tools
